Improvements and Fixes

- Working day calendar module
- Log corrections
- Address field split in all related data structures
- Adding Message_Time_Long to IRU/IRA/RCL
- Adding Technical Ownership field in the PLO messages
- Improve the communication between SEID and DENTSU Router
- Reduce the maximum message size limit from 8MB to 6MB in communication with DENTSU Router
- Add the estimate UI generated time and UI generate time to case metadata
- Display router responses in UI
- Implement case migration tools from one account to another
- Acknowledgement of receiving bulk messages (IRU, IRA)

Known Issues and Problems

N/A
